PROJECT WORK/CERTIFICATIONS

Project: VKYC INTEGRATOR

Client (DCB bank)

Objective: Objective of the Integrator is to address the current compliance issues related to the current VKYC process, enable multiple VKYC service providers and overall improve the VKYC process. The scope of the integrator includes building the bridge APIs for VKYC service provider, develop a mechanism to download the VKYC session content from the VKYC service provider and provide a user interface for the auditor to review and complete the verification process. The verification process includes communication with the customer. The scope also includes delivering a dashboard with required reports.

The Integrator is a web application and the middleware is developed using PHP. Oracle database will be used for storing the data and files.

Project : Full Stack CRUD Application

Technologies Used:

- Backend: Spring Boot (Java), MySQL database
- Frontend: React (JavaScript)

Objective:

The primary objective of this project is to create a web application that allows users to perform CRUD operations on a specific dataset, such as products, tasks, or any other domain-specific entity. Users can create new records, view existing ones, update records, and delete them.

CERTIFICATIONS:

- Java Full Stack
- IOT

TECHNICAL SKILLS

- **Java Full Stack Development** : React Js | Spring boot
- **Programming Languages**: Java(Core &Adv)| Javascript | SQL
- **Frontend Development**: React Js | HTML5 | CSS5 | Bootstrap
- **Backend Development**: Spring Boot |API's|DSA
- **Database**:MySQL
- **Version Control & Collaboration**: Git | GitHub
- **Problem solving**
- **Communication**
- Skilled in debugging
- Effective collaborator and team player
- Continuously learning and adapting to new technologies

ACADEMIC ACHIEVEMENTS&CO-CURRICULAR ACTIVITIES

- Completed NPTEL certification course in “Introduction to Industry 4.0 and Industrial Internet of Things”.
- Participated in IOT Workshop which was organized in college on Nov 06,2021.
